ACROSSCHECK

Buy ACROSSCHECK™, invented to avoid the Luck-of-the-Draw letter selection.

Free to choose any word [up to 8 letters] you like, to combine with words already played, and release the scoring potential of your words, by unlocking the Premium Factors (2 to 5) held in the Premium Squares.

Can you exploit the almost limitless scope this freedom confers?

No more unplayable letters, **only select letters which form your chosen word**.

As all 134 letters are visible throughout the game players have an opportunity to plan ahead chess-like.
