CSW Variant Spellings

**** Now amended for CSW19 ****

David Sutton

Introduction

This document seeks to provide a comprehensive selection of variant spelling forms in CSW19, for words up to nine letters in length.

It is offered principally for linguistic interest, but may also ease at least marginally the task of word learning by grouping the words into 'variant spelling' sets. The following provisos should be noticed.

- only root forms are listed. It can normally be taken for granted that inflections follow suit.
- only root forms with nine or fewer letters are included, except that if these have variant spellings with more than nine letters, those longer spellings are shown.
- it must be remembered that some variants may possess part of speech properties not possessed by other variants of that form. For example, in the case of ALARM/ALARUM/LARUM, ALARM and ALARUM are both noun and verb, but LARUM is noun only. I have assumed that Scrabble players serious enough to be interested in this document are likely to be aware of such nuances, or prepared to research the matter further on their own account. Similarly, some variant spelling may possess additional meanings not shared by others e.g. HECKLE can mean to interrupt a speaker as well as being a variant of HACKLE/HATCHEL, a kind of comb. I have not attempted to indicate all possible meanings.
- this document restricts itself to variant spellings. It is not about words unrelated by spelling which refer to the same thing. For example, KAAMA is another name for the HARTBEES, HARTBEEST or HARTBEEST, but you won't find that here. But I have erred somewhat on the side of generosity by including e.g. adjectival forms which are not strictly speaking variant spellings but which differ only by ending and have the same or virtually the same meaning e.g. LACTEAL/LACTEAN/LACTEOUS, which all mean, more or less, 'milky'. I also include words which are essentially the same word but which have acquired slightly different nuances of meaning e.g. CAPTIVE, CAITIFF and CAITIVE, which all derive from Latin captivus, but where the (obsolete) CAITIFF and CAITIVE carry a suggestion of baseness absent from the modern form CAPTIVE.

I shall be glad to know of any errors or omissions.
